

Make a snowman lantern

You will need: jam jar, tissue paper (or the thinnest white paper you have) , glue stick, sharpies, cotton wool balls or pom poms, pipe cleaners x2 and a battery light

STEP 1: tear up the tissue paper and stick on the jar with the glue stick without leaving gaps.

STEP 2: Draw on eyes , nose and mouth with a pen (or cut out shapes and stick on)

STEP 3: Stick on the cotton wool balls or pom-poms as ear-muffs. If you have 2 pipe cleaners you can twist them around the top of the jar to create a handle for your lantern,

Put it by your window or front door!
